

DATA SAFETY YOU CAN TRUST

Your research is protected - always

- Customizable validation rules prevent errors at the point of entry.
- Role-based access control and data usage dashboards.
- Full audit of every data change (who, when, what).
- Hourly local backups and encrypted offsite backups stored for at least two months.

We acknowledge the Traditional Custodians of Country throughout Australia and recognise their continuing traditions and connection to land, waters and culture where we work. We pay our respects to their Elders past, present and emerging.

APV Lab & Field

CLOUD-BASED DATA SAMPLE MANAGEMENT SYSTEM

***Your Essential Companion for
Laboratory and Field Research***

WWW.APVLNF.COM

MOVE BEYOND SPREADSHEETS

Spreadsheets have long been the go-to tool for organizing data and managing information, but they fall short when managing complex data long-term.

APV Lab&Field offers the power of a robust database engine without requiring users to learn database design or query languages.

- Built-in database engine - no need to learn SQL or schema design.
- Data integrity, normalization, and powerful search capabilities.
- Intuitive interface for users of all technical levels.

BUILT FOR LONG-TERM MONITORING

Research projects often span years and generate vast amounts of data. APV Lab&Field ensures that your data remains organized, searchable, and easy to maintain throughout the life of your project.

- Ideal for biological, environmental, and ecological research.
- Built to handle various data types including GPS coordinates and files.
- Supports individual subject tracking (e.g., animals or plants).
- Record relationships between subjects and locations.

STREAMLINE YOUR DATA COLLECTION PROCESS

Customizable Protocols

- Design protocols to guide sampling events.
- Ensure all required data are captured consistently.
- Dynamically modify data capture requirements based on user input.

Mobile Data Collection, Anywhere

- iOS and Android apps for remote data entry.
- Works without internet; syncs automatically when reconnected.
- Modify or delete entries before upload.
